Office Action Summary	Application No. 10/763,675	Applicant(s) SHELSTAD, SCOTT A.	
	Examiner Stephen J. Castellano	Art Unit 3727	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 20 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 recites the limitation "the body" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 23 recites the limitation "the body" in line 5. There is insufficient antecedent basis for this limitation in the claim.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Macaluso, Jr. et al. (3,399,780) (Macaluso).

Macaluso discloses an apparatus in combination with a cup, the apparatus assists in identifying the cup, the cup having an opening defined by an enlarged, annular peripheral rim, the apparatus comprising a body including an attachment portion (20, 22, 24 – the upper inverted U shaped portions which attach to the peripheral rim).

Re claims 6-9, 20 and 23, the tab is either the interior or exterior portion of one of the inverted U-shaped portions, the tab includes a protrusion at a distal end (at least one of the ribs

Art Unit: 3727

22 or lugs 24), the lugs 24 and the outer and inner ribs 22 (shown in cross section in Fig. 5) are arcuate in shape, and both of the ribs 22 are angular in shape.

Re claim 11, the inverted U shape of the attachment portion is curved to approximately conform to the rim curvature.

Re claims 12-14, 20 and 23, the identification portion is the arm 18, the identification portion is disposed adjacent to the sidewall. Re claim 16, the identification portion is customizable.

Re claim 17, the attachment portion is configured for engaging the rim without application of a continuous, resilient biasing force to the rim.

Re claims 21-23, the method of use is disclosed wherein the attaching step is performed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Macaluso.

Macaluso discloses the invention except for the flexing of the rim of the cup. Official notice is taken that plastic and paper cups with enlarged, annular peripheral rims which flex are well known. It would have been obvious to modify the cup to be plastic or paper as these materials are readily available, relatively inexpensive, and do not shatter or break when dropped.
